

San Patricio County **Environmental Health Department**

313 N. Rachal St. Sinton, TX 78387 (361)587-3500

PLAN REVIEW FOR FOOD ESTABLISHMENTS AND PERMITTING REQUIREMENTS

When a Food Establishment is newly constructed or extensively remodeled, When a Food Establishment has a change of ownership, When an existing structure will be converted for use of a Food Establishment: Properly prepared plans and specifications for such construction, remodeling, or conversion of the kitchen requires the pre-approval of the Environmental Health Department. The plans and specifications shall indicate the proposal layout, including sinks, refrigeration and restroom, arrangement, mechanical plans, and the type of construction materials in work areas. Food facility owners shall ensure during plan reviews. construction, and operation that their facilities comply with all applicable State, County, and City Plumbing, Mechanical, Electrical, Building, Zoning, and Fire Prevention and Protection Codes.

Once all permitting requirements have been met an Environmental Health Inspector shall inspect the Food Establishment prior to the start of operations to ensure compliance with the approved plans and specifications of this Article and the Texas Food Establishment Rules.

The attached requirements represent the minimal health code requirements, but are not to be considered as totally inclusive of all requirements. Any alteration to the set plans must be discussed with the Environmental Health Department office or it may result in noncompliance.

A health permit application have been provided.	can be obtained <i>only</i> wh	nen all the applicable do	cuments listed below

MAJOR REQUIREMENTS FOR APPROVED KITCHENS

Food Handler and Food Manager Certification: All establishments that handle open food must comply with the following: A. ALL employees must obtain and maintain an ACREDDITED food handler certificate recognized and approved by the Texas Department State Health Services. Food Handler classes are offered to the public by the San Patricio County Environmental Health Department. The cost is \$10 per person. Cash is the only acceptable method of payment. B. The permit holder or designated person in charge must obtain a State Approved Food Manager Certificate. The Original Certificate must be posted. A copy of these certificates must be presented to the county to be placed in the food establishment file. A Certified Food Manager must be present during all hours of operation, therefore more than one may be necessary. **Contamination Events** ____A written policy must be in place for employees to follow when responding to the clean-up of vomit and diarrheal events Procedures shall address the specific actions employees must take to minimize the spread of contamination and exposure of employees, consumers, food, and surfaces. First Aid Kit __First Aid Kits should be made readily available for emergency cases and stored in an area to prevent the contamination of food, equipment, utensils, etc. Water Supply: A connection shall be made to an approved public water system or a private source. If water supply from a private source is selected as a method to be used; then it is mandatory that the water well be tested prior to operating and must meet the state drinking water requirements. The private source must be tested annually or upon request by the Environmental Health Department. Original Lab results must be submitted for review. **Sewage Disposal:** All sewage and wastewater shall be disposed into a public sewage system or an approved commercial sewage disposal system that meets state and local requirements Walls and Ceilings: Walls and wall covering shall be designed, constructed, attached, and installed so they are smooth, easily cleanable, and non-absorbent. Exterior walls, windows, and doors that remain open will be protected in a manner as to prevent the entry of all pests. Except in areas used only for dry storage, concrete, porous blocks, or bricks used for indoor wall construction shall be finished and sealed to provide a smooth, nonabsorbent easily cleanable surface. _Ceilings in all food preparation areas shall be designed, constructed, attached, and installed so they are smooth and easily cleanable. This includes self-service areas, bars and server areas. Attachments to walls and ceilings such as light fixtures, mechanical room ventilation system components, vent covers, wall mounted fans, decorative items, and other attachments shall be easily cleanable. Studs, joists, and rafters may not be exposed in areas subject to moisture. Floors: Exposed horizontal utility service lines and pipes may not be installed on the floor. In food establishments in which cleaning methods other than water flushing are used for cleaning floors, the floor and wall junctures shall be covered and closed to no larger than one millimeter.

graded to drain, and the floor and wall junctures shall be covered and tightly sealed.

other areas subject to moisture, flushing or spray cleaning methods.

The floors in food establishments in which water flush cleaning methods are used shall be provided with drains and

Carpeting may not be installed as a floor covering in food preparation areas, toilet rooms, refuse storage rooms, or

If carpeting is installed as a floor covering in areas other than those specified in the above paragraph, it shall be: securely attached to the floor with durable mastic and installed tightly against the wall with the edges of the carpet secured.
Floor coverings, mats, and duckboards shall be designed to be removable and easily cleanable.
Shelving and Cabinetry: Unfinished construction is not allowed anywhere. Interiors of all cabinetry and shelving shall be finished with a smooth, non-absorbent, easily cleanable surface. Shelving and racks shall store food and food-related items a minimum of six inches off the floor and provide an easily cleanable area between the floor and lowest shelf. Wooden shelves or racks are not permitted in refrigerated storage areas. Stainless steel or other non-corrosive metal shelving will be used in refrigerators, freezers, and walk-ins.
Hand Wadding Landson
Hand Washing Lavatories: Post sign that states "All Employees Must Wash Hands" near hand-washing sinkTrashcan must be near hand-washing sink when using paper towels to hand dryLavatories designed only for hand washing are required if any type of food/drink preparation or ware washing is conducted within the establishmentLavatories shall be conveniently accessible in food/drink preparation, food serving, ware washing areas, and toilet rooms. Hand sinks are not considered conveniently accessible in another room, example, walking through a doorway, or not being visibleLavatories shall be equipped with hot (100 degrees F) and cold water supplied through a mixing valve or combination faucetLavatories shall be located to avoid contamination of food and food-related items and areas. Splashguards may be used to meet this requirement.
Ware Washing Facilities:
A minimum of three compartments stainless steel sink (preferred) for the manual washing, rinsing, and sanitization of equipment and utensils when preparing any potentially hazardous food. All ware washing sinks shall be sized to submerge the largest piece of portable equipment. Separate drain boards or other suitable equipment must be used for soiled and clean equipment and utensils shall be attached or adjacent to all ware washing fixtures. Automatic dish washing machines may supplement the installation of sinks for manual ware washing but not replace this minimum requirement.
Chemical Test Kits:
Chemical test strips for the appropriate sanitizer are required for the testing of sanitizer solutions used in the food establishment. For example, bleach test strips, T-Strips or a waterproof thermometer for testing heat sanitizing dish machines.
Thermometers:
Refrigerators, freezers and hot holding units used for the storage of potentially hazardous food shall have accurate, readily visible thermometers. Range of thermometer shall be 0 to 220 degrees Fahrenheit. Stem thermometers are required for the monitoring of food temperatures. Stem thermometers shall be accurate and available to the staff.
<u>Utility Service Sink (mop sink):</u>
At least one utility sink or curbed cleaning facility shall be provided for the cleaning of mops and similar floor cleaning tools and the disposal of mop water or other wastewater. The utility service fixture shall be located to avoid the contamination of food and food related items and areas. The utility service fixture shall be provided with hot (100 degrees F) and cold water. A vacuum breaker or approved vacuum breaker device shall be installed if a hose is connected.
Plumbing:
Soda machines shall have an adequate backflow prevention device when connected to a potable water supplyApproved backflow prevention devices shall be installed on devices connected to the potable water system, such as: chemical injectors, attached hoses, spray wands and other similar instances where there is a direct connection between the potable water system and non-potable water. This includes the outside faucetsExcept for properly trapped open sinks, there shall be no direct connection between the sewage system and any

drains originating from equipment in which food or utensils are placed. Such fixtures shall be drained through an indirect

	waste with a minimum one-inch air gap, where applicable. Examples would include, but not limited to, ice machines, food preparation sinks, floor drains in walk-in boxes, steam tables, salad bars, etc.
	The Environmental Health Department does NOT regulate the installation of grease traps.
	Owner/operators must contact the Pre-Treatment Services Division of the Water Department with-in their city
	regarding the need, size, and proper plumbing installation of grease traps.
	As general rule grease traps should be located outside. If a G. T. has to be installed indoors, the top of the trap shall be flush with the fluor. An expension to this rule may emply when the grease trap is located above enother floor. Grease
	be flush with the floor. An exception to this rule may apply when the grease trap is located above another floor. Grease traps shall be accessible for cleaning and be maintained as required.
	Water heaters shall be adequately sized to provide a constant and ready flow of hot water to all supplied fixtures.
	Water heater shall be behind a door or otherwise enclosed if it is located in the kitchen.
Equip n	nent Design and Installation:
	Only equipment designed and constructed for commercial use is preferred in food establishments. Residential,
	home-type freezers, ranges, ovens, etc. are not permitted.
	If <i>immobile</i> , the installation of freestanding equipment such as: refrigerators, fryers, tables, shall be: 1) Sealed to the floor
	, , , , , , , , , , , , , , , , , , ,
	2) Installed on a raised platform of sealed concrete; or
	3) Elevated on legs to provide a minimum six-inch clearance between floor and equipment. Sufficient space shall be provided for easy cleaning between and behind each unit of floor-mounted equipment, or
	the space between it and adjoining equipment units and adjacent walls shall be closed and sealed.
	A minimum three-foot working space/aisle shall be maintained throughout the establishment in food preparation,
	food serving, and ware washing and storage areas.
	The tops of all walk-in boxes and vent-hoods shall be extended to the ceiling and properly sealed.
Ventila	
	A vent-hood system is required when any operation within the kitchen produces excessive heat, steam, condensation, grease-laden vapors, obnoxious odors, smoke and/or fumes and shall meet the requirements of your
	city.
	Easily removable, easily cleanable filters are required in vent-hoods and ventilation systems and shall be maintained
	clean.
Toilet R	
	Toilet rooms shall conform to all building, plumbing, and health code requirements.
	Toilet facilities shall be conveniently located and shall be accessible to employees at all times.
	Toilet rooms shall be completely enclosed and have tight-fitting self-closing solid doors. Toilet rooms shall have forced-air ventilation to the outside of the establishment.
	Toilet room shall be provided with a covered trash receptacle.
	Sink must have hot and cold running water.
	Toilet rooms must provide toilet paper on dispenser, hand soap, disposable towels on a dispenser and signage stating
	employees, must wash hands before returning to work.
Lighting	
	Adequate artificial illumination shall be provided in accordance with the following minimum requirements.
	At least 110 law (10 feet condies) at a distance of 75 continuators (20 inches) above the floor in walk in refrigeration
	At least 110 lux (10 foot candles) at a distance of 75 centimeters (30 inches) above the floor in walk-in refrigeration

Garbage and refuse containers, dumpsters, and compactor systems shall be stored on a smooth surface of nonabsorbent material, such as concrete or machine laid asphalt.

If a washer is provided, a dryer must also be provided for the drying of washed items. (Exception: Washing of only soiled wiping cloths placed directly into sanitizer solution and stored does not require a dryer.)
Washers and dryers may be located in dry storage areas containing only prepackaged items, otherwise separate rooms shall be provided for laundry facilities.
Insect and Rodent Control:
Outside openings shall be effectively protected by tight-fitting, self-closing doors, closed windows, screening, or other means to prevent entry of insects and rodents.
Air curtains or plastic thermal curtains are strongly recommended on exterior service doors and may become a requirement if insect exclusion problems are noted during the future operation of the establishment.
Insect control devices that are used to electrocute or stun flying insects shall be designed to retain the insect within the device.
Insect control devices shall be installed so that: the devices are not located over a food preparation area; the dead insects and insect fragments are prevented from being impelled onto or falling on exposed food, clean equipment, utensils, linens and unwrapped single-service and single-use articles.
May not have any pesticides in establishment, pest control must be done by a licensed applicator
<u>Toxic Material Storage:</u> All poisonous or toxic materials shall be stored in cabinets or in similar physically separated compartments or
facilities used for no other purpose. Such materials shall not be stored above or immediately adjacent to or in areas where food or food-related items are handled, prepared, washed, or stored.
Dry Storage Areas:
Food storage shall be adequate for the operation of the establishment. Food shall be protected from contamination by storing the food in a clean, dry location where it is not exposed to splash or dust, and is at least (6) six inches above the floor.
Self-Service Areas:
Areas designated for customer self-service shall have smooth, easily cleanable, nonabsorbent flooring which shall extend at least (3) three feet from the perimeter of the self-service area.
Properly installed and effective sneeze guards shall protect self-service food displaysAt self-service displays where customers are allowed second portions of food, a sign shall be posted advising the customers that clean tableware is to be used upon their return to the self-service area.
Must have proper utensils at all food items.
Living Areas:
A private home may not be used for conducting food establishment operations.

You are ready to apply for a Health Permit in our office if all areas of this form have been considered

Requirements may vary depending on the type of food service operation.

Refer to Texas Food Establishment Rules for further rules TAC 25 Chapter 228 https://www.dshs.state.tx.us/foodestablishments/laws-rules.aspx
